

Fish & Game Cleaning Station

The cleanest, safest, fastest, and most efficient station available!

Model FG-6060

FabWright Inc. state-of-the-art Fish and Game cleaning station is the cleanest, safest, fastest and most efficient method for cleaning and preparing fish & game and then disposing of the waste. Cleaning stations located near boat ramps and campsites lessen the chance that fish and game will be cleaned in inappropriate areas such as restrooms. Manufactured of stainless steel with poly cutting boards, each station is equipped with a heavy-duty garbage disposal. The ground-up waste is deposited directly into the sewage system to rapidly remove waste... and its accompanying odor.

Designed for fishing and hunting facilities

APPLICATIONS

- Reservoirs, Lakes and Rivers
- State, county and city parks
- Marinas, docks and piers
- Private campgrounds
- RV parks
- Lodges, hotels and motels
- Open range, preserves and clubs

BENEFITS

- Workspace for 4 users at one time
- Meets ADA requirements
- Total package: One manufacturer, one order, one warranty
- Easy installation in two hours. The system is completely factory-wired, plumbed, assembled and tested
- For safe, trouble-free operation, the disposer has only one moving part.
- FabWright Inc. heavy-duty 3, 5, 7.5, or 10 HP disposer with our *exclusive* 5-way cutting action (single or three phase motor)
- Fast and easy maintenance
- Full one-year limited warranty
- Highest product safety standards
- Satisfaction guaranteed!
- Serving the industry since 1956
